WaterLink® Solutions™ for Drinking Water,
Cooling Water, Commercial Pool Professionals,
and Fresh & Salt Water Fish Farming
Applications

A flexible solution for water analysis.

WaterLink® Solutions™ for Drinking Water, Cooling Water, Commercial Pool Professionals, and Fresh & Salt Water Fish Farming Applications

Whether we're drinking it, washing with it, or swimming in it, clean and healthy water is essential. Yet every industry has different needs for a water analysis program. What's important is that test results are accurate, that treatments match the need, and records are retained. WaterLink® Solutions™ boasts the flexibility to cater to any market, the ease of a modern web program, and the power to support commercial professionals all water-walks of life. And best of all, WaterLink® Solutions™ is free.

The screenshot displays the WaterLink Solutions web application. The interface features a blue header with a search bar and a user profile for Jason Fakeman. A left sidebar contains navigation links for Tester Controls (Add New Property, Add New Contact, Add New Site, Test Water) and Admin Controls (Account Information, System Settings, Users and Roles, Water Test Profiles). The main content area is divided into three sections: Property Information, Linked Sites, and Linked Contacts. The Property Information section shows details for 'Hotel California' with an 'Edit Property' button. The Linked Sites section contains a table with one entry, 'Cali Pool', and buttons for 'Create New Linked Site', 'Link Site', and 'Start water test'. The Linked Contacts section has buttons for 'Create New Linked Contact' and 'Link Contact'.

Flexible Data Management

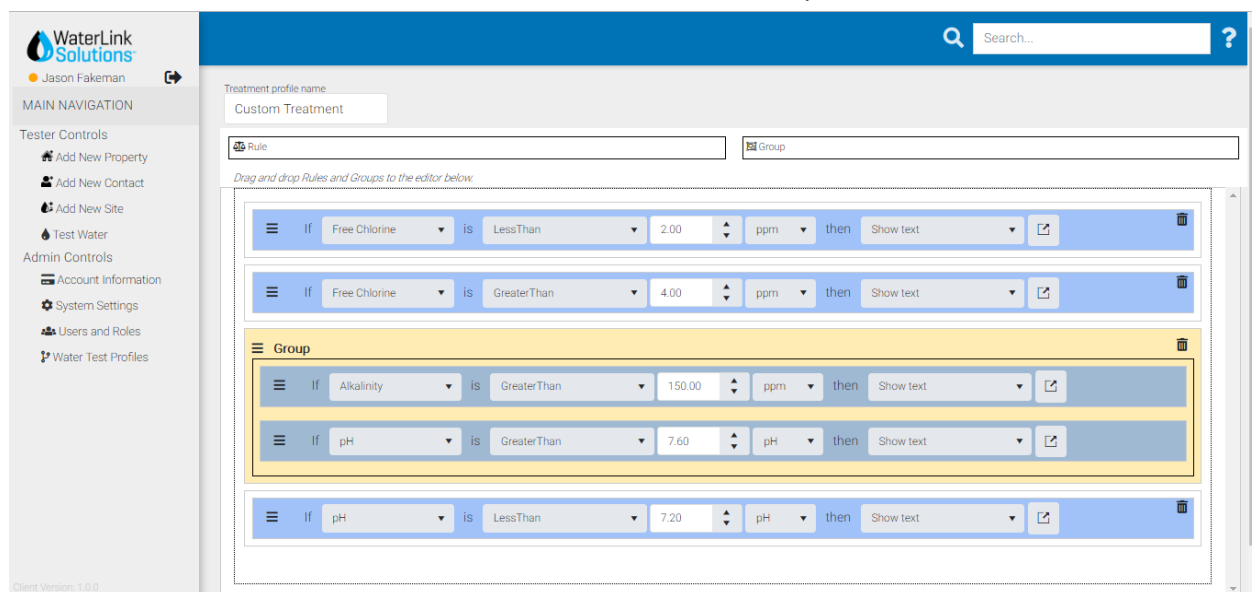

Tested water is considered a Site. Sites are typically located at a physical address — a Property. Individuals that need to be notified when a water test is completed are Contacts. WaterLink® Solutions™ lets you manage each of these entities separately or link them together to build relationships between them. Use as much or as little as you need to get the job done.

- Manage records across three entities: Properties, Contacts, and Sites
- Flexible linking of entities builds relationship between your data
- Intelligent search controls help you find exactly what you are looking for

Powerfully Logical

Enter test results manually, or transfer them using WaterLink® Connect (<http://softwarecenter.lamotte.com/waterlinkconnect.php>) and one of LaMotte's accurate, reliable meters, like the WaterLink® Spin Touch® (<http://www.waterlinkspintouch.com/spin-touch-dw.html>). Results are stored in WaterLink® Solutions™ by Site with a date and time the test was performed. But it doesn't stop there. WaterLink® Solutions™ Treatment Profile editor provides simple "fill in the blank" rules and a drag and drop interface to build custom water treatment recommendations with previously unseen flexibility.

- Connect a supported LaMotte meter for live transfer of test results.
- Build detailed, custom, and incredibly tailored treatment recommendations from an easy-to-use drag and drop editor.
- Build recommendation Rules then organize them into the proper order to create your recommendations.
- Drop Rules into Groups so only the right Rules are executed at the right time.

Web and Mobile Apps

With an intuitive web interface, WaterLink® Solutions™ can be used from your PC, but if you want to take it on the go, download the WaterLink® Solutions™ app for Android® or iOS®. Transfer results over Bluetooth® from the WaterLink® Spin Touch® (<http://www.waterlinkspintouch.com/spin-touch-dw.html>) wherever you are to a supported mobile device.

Free to Use

WaterLink® Solutions™ is free to use. Sign up and get started immediately. Every account comes with a single User License. Additional user licenses are available for an additional fee, but are entirely optional. Additional addons and featuresets will be available in the future that will expand and grow what WaterLink® Solutions™ can do, but the core program will always be free.

- Free to use... Register now (<https://solutions.waterlinkconnect.com/register>) for Free!
- Optional addons expand the program's functionality
